

Fighting Coronavirus With Tyranny & Globalism | Behind the Deep State

Written by TNA Video | Monday, 30 March 2020

In this episode of Behind The Deep State, host Alex Newman explores the Deep State effort to supposedly fight the Chinese virus with more tyranny and globalism. In particular, Alex goes through a Rockefeller Foundation report that imagines a hypothetical pandemic. Dubbed "Lock Step," this scenario praises Communist China's ruthless measures while attacking the United States. Newman also exposes the push for a New World Order, mandatory vaccines, a global Special Drawing Rights currency by the IMF, ID2020, and other schemes funded by the Bill Gates Foundation. Basically, the Deep State is using this hysteria to wage war on liberty, nations, and privacy. Don't let them win.
